SYSTEM AND METHOD FOR PROVIDING CHARACTER INTERACTIVE

INPUT/OUTPUT

Abstract of the Disclosure

5   A system and method for supporting character
interactive input/output operation in a half-duplex block-
mode environment including a workstation and a server.
Keystrokes at the workstation received into an auto enter,
non-display entity on the workstation display are
10   automatically transferred as entered from the workstation to
a server application which processes the keystroke and
responds in a manner appropriate to the context of the
application.
